2	A sample article title	2						
3	_	3						
4	First Author	4						
5	First Department of the First Author, University and Second Department of the First Author,	5						
6	University	6						
7	SECOND AUTHOR	7						
8	Department of the Second and Third Authors, University	8						
9	Department of the second and Timu Authors, Oniversity	9						
10	Third Author	10						
11	Department of the Second and Third Authors, University	11						
12	Department of the second and Time Audiors, Oniversity	12						
13	The abstract should summarize the contents of the paper. It should be	13						
14	• •	14						
15	clear, descriptive, self-explanatory and not longer than 150 words. It	15						
	should also be suitable for publication in abstracting services. Please							
16	avoid using math formulas as much as possible. We recommend 3–8	16						
17	keywords and up to 3 JEL codes.	17						
18	KEYWORDS. First keyword, second keyword, third keyword.	18 19						
19	IEL CLASSIFICATION. First IEL, second IEL.							
20	, 02000	20						
21	1. Introduction	21						
22		22						
23	This template helps you to create a properly formatted $\text{MT}_{E}X 2_{\varepsilon}$ manuscript. Pre-	23						
24	pare your paper in the same style as used in this sample .pdf file. Try to avoid	24						
25	excessive use of italics and bold face; underlining is generally banned (except for	25						
26	First Author: first@somewhere.com	26						
27	Second Author: second@somewhere.com	27						
28	Third Author: third@somewhere.com	28						
29	We thank four anonymous referees. The Editor should not be thanked anonymously or by name in	29						
30	this footnote, or elsewhere in the paper. The first author gratefully acknowledges financial support							
31	from the National Science Foundation through Grant XXX-0000000.	31						
32		32						

The following is an example of an *enumerated* list, two levels deep.

as (e.g., econ. \ theory).

32

(i) This is the first item of an enumerated list. Each item in the list is marked 1 with a "tick." The document style determines what kind of tick mark is 2 used. 3 3 4 4 (ii) This is the second item of the list. It contains another list nested inside of 5 it. 6 6 7 (a) This is the first item of an enumerated list that is nested within. 7 8 (b) This is the second item of the inner list. MEX allows you to nest lists 9 deeper than you really should. 10 10 11 This is the rest of the second item of the outer list. 11 12 12 (iii) This is the third item of the list. 13 13 14 14 Do not use (1), (2), etc. for items in order to avoid confusion with numbered 15 15 equations. 16 16 17 17 18 18 3.2 Punctuation 19 19 Avoid unnecessary hyphenation; many hyphenated words can be treated as one or two words. Dashes come in three sizes: a hyphen, an intra-word dash like "U-21 statistics" or "the time-homogeneous model"; a medium dash (also called an "endash") for number ranges or between two equal entities like "1-2" or "Cauchy-23 Schwarz inequality"; and a punctuation dash (also called an "em-dash") in place 2.4 of a comma, semicolon, colon or parentheses—like this. 2.5 2.5 Generating an ellipsis ... with the right spacing around the periods requires 26 2.6 using \ldots. 27 2.7 Theoretical Economics is using longer spaces after periods, please add \ af-2.8 ter periods that are not at the end of a sentence, in order to have regular 29

spaces. For example, if there is an abbreviation (e.g., econ. theory) which is not the end of an article but appears in a middle of a sentence, please code it

1	3.3 Citation	1					
2	Only include in the reference list entries for which there are text citations, and	2					
3	make sure all citations are included in the reference list. Simple author and year ³						
4	cite: Aumann (1987). Multiple bibliography items cite: Peck (1994), Enelow and	4					
5	Hinich (1990), Wittman (1990). Author only cite: Wittman. Year only cite: (1990).	5					
6	Citing bibliography with object Aumann (1987, Theorem 1). Citing within brack-	6					
7	ets is done with the same commands (e.g., Peck (1994), Enelow and Hinich (1990),	7					
8	Wittman (1990)).	8					
9		9					
10	4. Fonts	10					
11	Please use text fonts in text mode, e.g.:	11 12					
13		13					
14	<pre>Roman </pre>	14					
15	<pre>Italic </pre>	15					
16	D 11)	16					
17	<pre>Bold </pre>	17					
18	SMALL CAPS	18					
19	Cong parif \ + arr+ af()	19					
20	Sans serif	20					
21	<pre>Typewriter </pre>	21					
22							
23	rease use mathematical forms in mathematical mode, e.g	23					
24	$ABCabc123 \mathbb{1}$	24					
25	$ABCabc123 \setminus \{\}$	25					
26	TID C WOOT SO (MICCITTE ()	26					
27	$ABCabc123 \setminus \{\}$	27 28					
28	$ABCabc123lphaeta\gamma$	29					
30		30					
31	\mathcal{ABC}	31					
32	$ABC \mathbb{C} $	32					

	Submitted to <i>Theoretical Economics</i> A sample running head title 5						
1	ABCabc123	1					
2	ADCab a102 \a+ b++ ()	2					
3	ABCabc123	3					
4	ABCabc123	4					
5	Note that \mathcal, \mathbb belongs to capital letters-only font typefaces.	5					
6	6						
7		7					
8	5. Notes	8					
9	Footnotes ¹ pose no problems in text. ² Please do not add footnotes on math.	9					
10	roomotes pose no prosionio in teim. Trouse de not dua roomotes en main.	10					
11		11					
13	6. Numbers	13					
14	A decimal point always should be preceded by a whole number and never should	14					
15	be left "naked." Decimal expressions of numbers less than 1 always should be	15					
16	preceded by a zero (0) to enhance the visibility of the decimal. For example, .3	16					
17	should be 0.3. This applies to text, tables, and figures.	17					
18		18					
19	7. OHOMATIONS	19					
20	7. QUOTATIONS	20					
21	Text is displayed by indenting it from the left margin. There are short quotations	21					
22	This is a short quotation. It consists of a single paragraph of text. There is no para-						
23	<pre>graph indentation. It should be coded between \begin{quote} and \end{quote}.</pre>	23					
24	and longer ones	24					
25 26	and longer ones.	25 26					
27	This is a longer quotation. It consists of two paragraphs of text. The beginning of	27					
28	each paragraph is indicated by an extra indentation.	28					
29	This is the second paragraph of the quotation. It is just as dull as the first paragraph.						
30	<pre>It should be coded between \begin{quotation} and \end{quotation}.</pre>	30					
31	This is an example of a footnote.	31					
32	² Note that footnote number is after punctuation.	32					

1	8. Environments	1					
2	Please use regular counters (Theorem 1) as opposed to counters belonging on ²						
3	sections (Theorem 3.1). Results (Lemmas, Propositions, Theorems, Claims) can	3					
4	be on the same or different counters.	4					
5		5					
6	8.1 Examples for plain-style environments	6					
7	THEOREM 1. This is the body of Theorem 1.	7					
8	THE SKELL I. Thus to the body of Theorem I.	8					
9	PROOF. This is the body of the proof of the theorem above. \Box	9					
10	CLAIM 1. This is the hody of Claim 1	10					
11	CLAIM 1. This is the body of Claim 1.						
12	AXIOM 1. This is the body of Axiom 1. Axioms should be on a different counter	12					
13	from results (e.g. Theorems, Propositions, Lemmas).	13					
14		14					
15	THEOREM 2 (Title of the Theorem). This is the body of Theorem 2. Theorem 2 has	15					
16	additional title.	16					
17	LEMMA 3. This is the body of Lemma 3. Lemma 3 is numbered after Theorem 2	17					
18	because we used [theorem] in \newtheorem.	18					
19		19					
20	FACT. This is the body of the fact. Fact is unnumbered because we used \newtheore	em@					
21	$instead\ of \newtheorem.$	21					
22	PROOF OF THEOREM 2. This is the body of the proof of Theorem 2. □	22					
23	TROOF OF THEOREM 2. This is the body of the proof of Theorem 2.	23					
24	8.2 Examples for remark-style environments	24					
25		25					
26	The following environments can be numbered or not; if numbered, they should	26					
27	be on different counters from results.	27					
28	DEFINITION 1. This is the body of Definition 1. Definitions should be on a differ-	28					
29	ent counter from results (e.g. Theorems, Propositions, Lemmas).	29					
30		30					
31	EXAMPLE. This is the body of the example. Example is unnumbered because we	31					
32	used \newtheorem* instead of \newtheorem. ♦	32					

REMARK 1. This is the body of the remark.

9. EQUATIONS AND THE LIKE

Only number equations to which there is a subsequent reference. See equations below (1)–(7). Please punctuate equations as you would punctuate a sentence, that is add a comma between two equations and add a period if it ends a sen-tence.

Two equations:

$$C_s = K_M \frac{\mu/\mu_x}{1 - \mu/\mu_x} \tag{1}$$

and

1.3

2.6

$$G = \frac{P_{\text{opt}} - P_{\text{ref}}}{P_{\text{ref}}} 100(\%). \tag{2}$$

Equation arrays:

$$\frac{dS}{dt} = -\sigma X + s_F F,\tag{3}$$

$$\frac{dX}{dt} = \mu X,\tag{4}$$

$$\frac{dP}{dt} = \pi X - k_h P,\tag{5}$$

$$\frac{dV}{dt} = F. ag{6}$$

One long equation, note that the equation number is on the last line:

$$\mu_{\text{normal}} = \mu_x \frac{C_s}{K_r C_r + C_s}$$
24

$$= \mu_{\text{normal}} - Y_{x/s} (1 - H(C_s)) (m_s + \pi/Y_{p/s})$$
 26

$$= \mu_{\text{normal}}/Y_{x/s} + H(C_s)(m_s + \pi/Y_{p/s}). \tag{7}$$

Note that variables made of more than one letter should use command \mathit, e.g., sov = 550, where sov is sum of votes. Abbreviations used in subscripts or superscripts should use \mathrm, e.g., $t_{max} - t_{min} = 10$. Operator names should use \operatorname, e.g. AR(1). Also, note that \emptyset symbol is preferred to \emptyset .

Note: This is how table note should be presented. Please do not use asterisks or bold face to denote statistical significance. We encourage authors to report standard errors and coverage sets or confidence intervals.

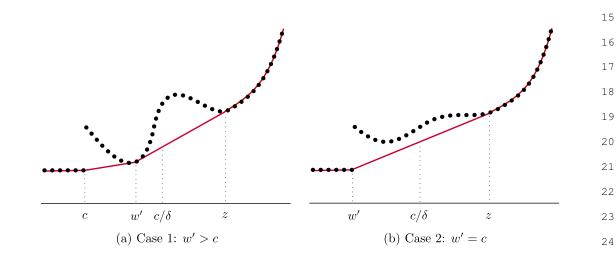

FIGURE 1. The dotted lines show the values of u(x) for x in the discrete support of F. The solid lines show $u_{\text{conv}}(x)$.

10. Tables and figures

Cross-references to labeled tables: As you can see in Table 1 and also in Table 2.

Sample of cross-reference to figure: Figure 1 shows that it is not easy to get something on paper. Note that figures will be in grayscale in the printed version.

APPENDIX: TITLE

Appendices should be provided in {appendix} environment. If there is only one appendix, then please refer to it in text as ... in the Appendix.

APPENDIX A: TITLE OF THE FIRST APPENDIX

If there are more than one appendix, then please refer to it as ... in Appendix A, Appendix B, etc.

APPENDIX B: TITLE OF THE SECOND APPENDIX

B.1 First subsection of Appendix B

If your appendix is long, make sure to divide it into subsections and refer to them in text. Use the standard LTEX commands for headings in {appendix}. Headings and other objects will be numbered automatically.

$$\mathcal{P} = (j_{k,1}, j_{k,2}, \dots, j_{k,m(k)}). \tag{8}$$

1	Sample of cross-reference to formula (8) in Appendix B.1. Note that it is better	1
2	to refer to Appendix B.1 as opposed to Appendix B, because it is easier for the	2
3	reader to locate the necessary place.	3
